

Esker DeliveryWare 5.0 solution for SAP®

With the dedicated SAP Connectivity Suite connector for SAP, Esker DeliveryWare helps organizations meet the challenges of eliminating paper based communication, reducing costs and improving profitability. This Certified for and Powered by SAP NetWeaver component seamlessly integrates Esker DeliveryWare into SAP Business Suite applications, adding value to SAP solutions by enabling automated document delivery for streamlined supply chain communication and shorter business transaction cycle times.

Tight Integration

Offering a practical and non-intrusive solution for integration of automated document delivery, Esker DeliveryWare resides on a server and connects to SAP Business Suite applications as an independent device. This architecture offers significant advantages:

- No SAP programming changes are required.
- Esker DeliveryWare supports SAPconnect, SAP External Output Management (XOM) and Enterprise Services interfaces, enabling direct access from any SAP application module.
- Esker DeliveryWare integrates seamlessly and delivers full automated document delivery capability to SAP software users. In addition, it independently links to mail servers, business applications, networks, and multiple hosts. Because Esker DeliveryWare can communicate with the enterprise either through or independently of SAP applications, it offers unique flexibility for heterogeneous systems.

Ease for the User

Sending, viewing, and managing documents is easy for SAP software users, who access Esker DeliveryWare

from within their familiar SAP GUI or Web interfaces — applications. There is no training required and no delay enabling delivery throughout the enterprise.

The connector manages status notification back into SAP Business Workplace or SAP spool Administrator.

Flexibility for the Administrator

Using SAP Output Determination and output types, administrators can configure Esker DeliveryWare as the default output device if required. In addition, administrators can set notification parameters and SAP spool support, and set automatic addressing to specify that certain recipients always receive documents via preferred methods.

Output Connector for SAP

Output Connector for SAP allows for automated retrieval, formatting, and delivery of SAP data via print, fax, email, Web, wireless, archive, Fax on Demand, or Mail on Demand. Status reporting on jobs is found in the SAP spool and can be managed within Esker DeliveryWare queues.

Output Connector for SAP integrates easily with SAP and uses the SAP output management interface BC-XOM.

Bidirectional Communication

Esker DeliveryWare not only makes SAP output management easy and flexible, it also allows you to import data from incoming documents such as sales orders into SAP applications through BAPI or Enterprise Services interfaces, removing the need to manually key-in information. Using the power of the DeliveryWare Rules Engine, data extracted from incoming documents can be checked against SAP master data before being forwarded to the system, ensuring data accuracy. The solution handles both basic and advanced user validation workflow whenever required by the business process.

Output Document Formatting Options

Documents from SAP applications can be directly routed. Esker DeliveryWare PCL5e and PostScript converters ensure preservation of the original documents' sharp fonts and clear graphics. Alternatively, the powerful Esker DeliveryWare formatting module can be used to enhance output from SAPscript or Smartforms.

System Requirements

- SAP R/3 4.6c, 4.7c or ECC5.0 or ECC6.0 installed on any platform.
- SAP Content Server v4.6 (document archiving)
- TCP/IP connection to Esker Platform
- SAP NetWeaver

Features Highlights

- **Integrates with multiple SAP applications** via SAPconnect, SAPscript or SAP SmartForms as well as SAP External Output Management Interface (SAP spool) or Enterprise Services
- **Automatically delivers information** in multiple electronic formats for high-volume production delivery needs
- **Provides flexible delivery confirmations methods**
- **Provides an easy to implement and flexible SAP output formatting tool**
- **Import external data into SAP applications** removing data entry steps
- **Direct access to the archived document** from SAP applications.

SAP NetWeaver Certified Integrations Achieved

Certified Integration Scenario and Version	BC-XOM 4.0 - External Output Management Systems 4.0
SAP Release Levels	SAP R/3 4.0, 4.5, 4.6; SAP NetWeaver Application Server 6.10, 6.20, 6.30, 2004, 7.0; SAP Basis 4.0, 4.5, 4.6
Certified Interface Software	Output Connector
Certified Interface Software Version	5.0
Certification Category	Fax systems, Output Management Systems, Platform User Licensing Compliant, Printing, SMTP, Solution Manager Ready
Qualification	Certified for SAP NetWeaver
Certification Date	08 Oct 2008

Certified Integration Scenario and Version	BC-SMTP 6.40 - SMTP Communication for Fax and Paging 6.40
SAP Release Levels	SAP NetWeaver Application Server 6.20, 6.30, 2004
Certified Interface Software Name	FAX SMTP 5.0
Certification Category	Fax systems, Output Management Systems, Platform User Licensing Compliant, Printing, SMTP, Solution Manager Ready
Qualification	Certified for SAP NetWeaver
Certification Date	08 Oct 2008

SAP NetWeaver Supported Integrations

Integration Scenario and Version	BC-CON 3.1 – SAPconnect Interface Fax Software R/3 3.1
SAP Release Levels	SAP R/3 3.1, 4.0, 4.5, 4.6; SAP NetWeaver Application Server 6.10, 6.20, 6.30, 2004, 7.0
Category	Enterprise Service Consumption, Enterprise Resource Planning, Enterprise SOA compliant, SAP Certified - Integration with SAP Applications, SAP Certified - Integration via Enterprise Services, Platform User Licensing Compliant
